

# TOWN OF BLADES

## HYDRANT

## FLUSHING

The Town of Blades is required to flush all fire hydrants within the town limits to determine flow and pressure.

The Blades Water Department will be flushing hydrants the week of **October 16<sup>th</sup> to October 20<sup>th</sup>, 2023**. Once the fire hydrants are flushed, dirty water may be seen when first turning on faucets. To correct this, turn on the cold water faucet and let water run until clear water appears. This may take two or three minutes, depending on the length of pipe for the water main.

All questions should be directed to the town hall 302-629-7366.
